

AUTOMOTIVE MARKET INTELLIGENCE

AutoScout24 Germany Dataset Analysis

A comprehensive evaluation of 46,405 used car listings, price dynamics, and valuation drivers across 11 registration years.

Total Listings

46,405

Time Window

2011 – 2021

Target Country

Germany

What is the AutoScout24 Dataset?

46,405 Market Listings

Scraped across 11 registration years from Germany's largest online car portal.

9 Key Features

Captures price, mileage, horsepower, year, fuel type, gearbox, make, and model.

77 Unique Brands

Broad spectrum ranging from volume commuter hatchbacks to exotic luxury supercars.

Dataset Schema & Baseline Averages

Average Price

€16,572

Median: €10,990

Average Mileage

71,178 km

Range: 0 to 1.1M km

Average Power

133 HP

Std Dev: 75.4 HP

Data Completeness Summary			
Attribute	Non-Null Count	Completeness	Data Type
price, mileage, year, make, fuel	46,405	100% Complete	int64 / object
model	46,262	99.69% Complete	object
gear	46,223	99.61% Complete	object

Domestic Brand Dominance in Germany

Volkswagen Leads Market

6,931 listings (14.9% market share).

German Premium Trio

Audi, BMW, and Mercedes command 16.0% combined volume.

Popular Import Brands

Skoda (2,889) and Renault (2,830) capture key budget share.

VALUATION TRENDS

Age-Price Trajectory & Value Curve

Registration Year Correlation

+0.41

Positive correlation between vehicle age and price. Median prices scale from €5,950 for 2011 models to €24,680 for 2020 models.

Powertrain Dynamics & Automatic Premium

Gasoline Dominance

62.2% total listings.

Diesel Share

32.8% market presence.

Automatic Delta

€14,489 price premium.

Horsepower as the Primary Valuation Driver

Single Strongest Feature

Horsepower exhibits a strong $r = 0.75$ correlation with price.

High-HP Tier Coupling

Vehicles over 200 HP are almost exclusively automatic.

Exponential Scaling

Power adds price exponentially in higher performance tiers.

PRACTICAL ANALYTICS APPLICATIONS

How to Leverage This Dataset

1. Automated Valuation

Train ML regression models (LightGBM/XGBoost) for instant fair-market valuation.

2. Residual Value Forecasts

Quantify annual value decay rates to assist leasing firms with buyback pricing.

3. Inventory Sourcing

Guide dealership acquisition toward high-turnover models like Golf, Corsa, and Focus.
