— PRACTICAL ANALYTICS APPLICATIONS

DEPLOYMENT & BUSINESS EXECUTION

1. AUTOMATED VALUATION

Deploy ML models (XGBoost / LightGBM) for instant, automated fair-market vehicle pricing.

2. RESIDUAL VALUE FORECASTS

Quantify annual value decay rates to optimize leasing fleet buybacks and residual risk.

3. INVENTORY ACQUISITION

Target high-velocity models like VW Golf, Corsa, and Focus for optimal dealership turnover.
